

November 7, 2025

Meeting open: 10:00 a.m.

Re: Virtual Meeting - RFP Electrical Services for new Facility located 172nd Ave., Grand Haven, MI 49417

Attendees:

Harbor Transit: Scott Borg, Dana Appel, Andrea Dumbrell, Brian Woline
Christman Co. (Construction Project Manager) Adam Seng
Progressive A&E (A&E Principal) Seth Horton
Electric Companies: Grand Haven Board of Light and Power (BLP)

Not Attended: Consumers Energy

Questions & Answer

- 1.) Do you happen to have a spec sheet on the Level 2 chargers? The designer will want to know so they can look up the make and model if they have any questions.

Answer: No

- 2.) Is the panel schedule and the electric one line that you sent me accurate for what you are doing now, or does it reflect what might happen in the future?

Answer: It has been upsized for twenty future electric vehicles at 11 kilowatts each.

The reason for me asking is that we will be building our facilities based on what is happening now, and not what might happen in the future because that would mean we would have to possibly install larger equipment that may not be fully utilized, and also might come at a higher cost to you to install larger than necessary equipment.

If the need for more power occurs in the future, then we would ask that you address that need when it is needed and the facilities would be upgraded at that time

3.) Clarification to question 9 on RFP

Answer: We are looking for rates for primary and secondary.

4.) Clarification: Panel schedules are not complete and Dana Appel will send out missing panel schedules by end of day November 7, 2025.

Meeting adjourn: 10:30 a.m.
